Blank faces designed so that you can draw your own emotions and expressions onto them.

There are two versions of each skin colour so you can write the name of the emotion below the face on one version if needed.

Printing Guidance

All pages contained within this PDF are in A4 paper size and in the 'portrait' orientation. We recommend that you use Adobe Reader to open our materials. The image below is of the Adobe Reader printing dialogue window presented to you when printing.

We are not able to offer support with troubleshooting individual printer settings as there are a significant number of printers on the market. This page offers suggested printer settings but does not outline the selection of a printer, number of pages to print, advanced printer settings etc.

Suggested Printer Settings

1. We suggest that you print these materials in colour, so please make sure 'Print in grayscale' is not ticked as per the image below.

2. Under Page Sizing & Handling please select ‘Fit’ to make sure that the whole page prints – if this is not selected some printers will cut off the sides and/or top/bottom of the pages.

3. Under Orientation please select the ‘Portrait’ option.
